Today's Class Notes

Learn Video Animation with Claude and Flow

- Today's class: make animated videos with AI

- Three tools used: Claude, Google Flow, Higgsfield

- Start in Claude, then make video in Flow

- Keep clips short at first, save credits

- Put an AI label on AI-made videos

Key Takeaway:

Learn the full workflow, then practise it yourself.

Step 1 - Start in Claude

- Make a project in Claude first
- Plan your video idea and story there
- Keep the idea simple and clear
- Ask Claude to edit and improve it
- Use the improved plan for your video

Key Takeaway:

A clear plan in Claude makes the video easier.

Step 2 - Make Video in Flow

- Go to flow.google.com
- Describe the scene in simple English
- Say who is there and what happens
- Make short clips first, not long ones
- Build the clips like a movie trailer

Key Takeaway:

Short, clear scenes save credits and look better.

Finish and Share

- Voice work: ElevenLabs, video work: Higgsfield
- Check each clip before you use it
- Put an AI label on AI-made videos
- Do not buy tools from random resellers
- Practise yourself, do not just copy

Key Takeaway:

Today we animated. Now make your own first video.
